THE EVOLUTION OF PATHOGENS
APRIL 17 - MAY 6
2020

Humanity has always thought itself to be standing at the top of the Food Chain - as an apex predator. Superior and Intelligent than most if not all.

We were Wrong, Always has been.

Viruses, since the dawn of life on this planet, has been on the top of the chain. They have always been the harbinger of Life and the messenger of Death.

In our contemporary era, we are now faced with a challenge, forced to ask a very peculiar yet a very vital Question.

Are the Viruses Evolving?

From SARS to MERS, From Ebola to Zika, From Nipah to Corona, viruses are gripping large number of population under their menace and the statistics are clear - They are not going to Stop. So another question emerges

Are we heading towards an Extinction Event?

Themes :

1. Anthropogenic Factors behind Viral Manifestations.
